VIDYA P

+91 6364121981 | vidyaparashram2005@gmail.com | LinkedIn: vidya-p-cs |GitHub: vidya-cse-dev | Bengaluru, India

PROFESSIONAL SUMMARY

Computer Science Engineering student skilled in Python, SQL, Excel, and Power BI, with hands-on experience in data cleaning, EDA, dashboard development, and data visualization. Strong analytical and problem-solving skills with a focus on deriving actionable insights to support business decisions.

WORK EXPERIENCE

Data Science Intern | SmartED Innovation *Dec 2025 - Jan 2026*

Remote, Bengaluru, Karnataka

- Analysed structured datasets using Python and Pandas to identify patterns and derive meaningful insights.
- Applied clustering and association rule mining techniques to explore customer behavior and migration patterns.
- Performed data preprocessing, feature engineering, and visualization to communicate analytical findings.

Technologies / Tools Used: Python, Pandas, NumPy, Matplotlib, Seaborn, Machine Learning

PROJECTS

Amazon Product Pricing & Review Analytics

- Analysed 1,465 Amazon product listings to identify pricing trends, discount patterns, category distributions, and customer rating insights.
- Cleaned and transformed data, created visualizations, and developed an interactive Power BI dashboard with KPIs and category-wise analysis.
- Identified an average listed discount of 47.69%, an average customer rating of 4.10/5, and a weak negative correlation between discounts and ratings.

Technologies / Tools Used: Python, Pandas, Matplotlib, Seaborn, Google Colab, Power BI, Power Query.

Customer Segmentation and Migration Analysis

- Conducted exploratory data analysis and feature engineering to examine customer behavior and migration patterns.
- Applied K-Means clustering and association rule mining to identify customer segments and behavioural relationships.
- Used data visualization and clustering evaluation techniques to explore patterns in customer data.

Technologies / Tools Used: Python, Pandas, NumPy, Seaborn, Plotly, K-Means Clustering, Apriori.

IPL Match Analysis & Prediction

- Analysed 1,095 IPL matches to identify team performance, match trends, toss impact, and player-related insights.
- Performed data cleaning, preprocessing, EDA, and interactive visualization using Matplotlib, Seaborn, and Bokeh.
- Built a Random Forest classification model for match outcome prediction and evaluated it using accuracy and confusion matrix.

Technologies/ Tools used: Python, Pandas, NumPy, Matplotlib, Seaborn, Bokeh, Scikit-learn, Random Forest

SKILLS

Programming Languages: Python, SQL

Data Analysis: Data Cleaning, Data Preprocessing, Exploratory Data Analysis (EDA), Feature Engineering, Statistical Analysis

Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, Plotly, Scikit-learn

Machine Learning: Supervised Learning, Unsupervised Learning, Regression, Classification, K-Means Clustering, Random Forest, Model Evaluation, Feature Selection

Data Visualization: Power BI, Excel, Dashboard Development, Data Storytelling

Data Mining: Association Rule Mining, Apriori Algorithm, Pattern Recognition, Customer Segmentation

Tools & Platforms: Jupyter Notebook, Google Colab, Git, GitHub, VS Code

Core Skills: Analytical Thinking, Problem-Solving, Critical Thinking, Data Interpretation, Communication

EDUCATION

B. Tech – Computer Science and Engineering

MS Ramaiah University of Applied Sciences, Bengaluru 2023 – 2027

CGPA: 9.0/10

CERTIFICATIONS

- Data Analytics and Visualization job simulation Certificate- Accenture
- IBM Cognitive Class - Data Science - IBM
- Data Science with Python Internship Certificate - SmartED Innovation
- Python Programming Internship Certificate - Innovate Inten.
